

Graduate Energy Consultant

Are you a fresh Graduate in engineering or similar and looking for an opportunity in energy management and carbon reduction industry in industry and built environment?

Do you want to join a dynamic and inspiring energy efficiency specialist with training on energy audits and decarbonisation role where you can work on interesting projects and play a key part in the success of the business?

EMC2 are a consistently evolving consultancy and expert in decarbonisation and energy management services for commercial and industrial buildings. The company have experienced significant success as the UK drives towards net zero carbon emissions, and as a result we are now looking to expand their team of passionate individuals to drive future growth.

In this role, the Graduate Energy Consultant will contribute to two areas of the business, ESOS energy audits primarily and decarbonisation projects. You will under the supervision of senior energy consultant be responsible for carrying out surveys on industrial and commercial buildings to assess energy, cost and carbon reduction opportunities.

The ideal candidate will have good understanding of energy management and energy audits for commercial / industrial buildings. Candidate must be an engineering or similar graduate from a reputable University in the UK or overseas.

This is a fantastic opportunity to build a long-term career within a well-established business of industry professionals, where you will be valued, receive personal development opportunities and work on interesting projects across the UK.

The Role:

- Play key part within energy management team, whilst contributing to ESOS team and decarbonisation projects
- Carry out energy audits on industrial and commercial buildings
- Advise on solutions for carbon reduction and energy efficiency
- Write technical energy audits reports
- Remote working with travel to sites nationwide

The Person:

- Bachelors or Masters in Engineering or Mathematical science (ideally related to energy or building services)
- Strong knowledge of energy management and energy audits
- Knowledge of ESOS
- Full UK Driving License with access to car will be an advantage

EMC2 will provide training on energy audit and solution development and you will be accompanied by a senior energy engineer on initial site surveys.

 Working from home with UK wide travel

£ £22,000 - £26,000 per annum
